

Project requirements

1. Group size: 3
2. Must be challenging: size/memory/computation
3. Intraday data
4. Rolling calibrations (NOT: 60/20/20)
5. Reproducible research: code + data
 - topic validation: weeks 10 and 12 (confirmation email)
 - zero overlap with ML for Finance
(complex computations applied to small data)
 - warning: (self-)plagiarism

Hands-on sessions during lectures → 70% of the project

Report format

Write a report in academic English with

- title, authors, and abstract
- motivation (introduction, aim)
- data set
- methods
- results
- Discussion: challenges encountered, suggested improvements
- Text: max 10 pages. Total, max 15 pages including references and figures
- join the code to your report (appendix). It MUST run !
- send me a **zip file** with the report in **PDF** format and the **code** and a link to the **data** used. No Word file.
- I will acknowledge receipt of your email within 1 working day.
If I do not, contact me immediately.
